earth vision'**

**'geographic phenomena spatial  
dimensions geog 486**

**May 14th, 2020 - geographic  
phenomena are often classified  
according to the spatial dimension best  
used to describe their nature these  
include points lines areas and volumes  
3d as you likely remember we used the  
spatial dimension of map elements e g  
line vs point in the last lab to decide  
how to symbolize and apply feature  
labels to our maps'**

**'cartography visualization of geospatial  
data fourth**

May 27th, 2020 - book description this  
fourth edition of cartography visualization  
of geospatial data serves as an excellent  
introduction to general cartographic  
principles it is an examination of the best  
ways to optimize the visualization and use  
of spatiotemporal data fully revised it  
incorporates all the changes and new  
developments in the world of maps such  
as openstreetmap and gps global'

**'information cartography using gis for  
visualizing non**

May 29th, 2020 - the goal of this paper is  
to present current methods models  
techniques and research for solving the  
problems of visuo spatial structuring of  
information with an emphasis on  
documentary type information as opposed  
to for example scientific data  
visualization and to systematize the use of  
cartographic metaphors and techniques  
for application to non geographic data'
